KEY QUESTIONS TO DEVELOP
ENTERPRISE SOFTWARE

What are your goals and how do you want to achieve them? These are some of the questions you should keep in mind as you begin to develop your business software. Define goals in a clear and concise manner and set priorities in developing them. Analyze the change that you are going to incite with this project and concentrate on solving the conflicts and problems that most impact the client.

At INVID, we have prepared a document that collects the most important questions when starting to plan the creation of a customized software for your company. We invite you to review all your important documents, notes, etc.; and begin to complete, in this document, all the information. At the end, you can print it and have a clearer and more organized view of your future project.

ABOUT THE SOFTWARE

Short description of the software:

Expected start day: Click or tap to enter a date.	Required date of use: Click or tap to enter a date.

Who will access the system?

Any high usage dates? ☐ YES ☐ NO

What do you expect to achieve with the software?

Please, explain the software process:

ADDITIONAL INFORMATION

Detail if any require printable version:

Detail whether to include version of edit, delete, etc .
